

Welcome to our December newsletter !

In our latest newsletter we feature two new case studies. These highlight two completely different building management systems which were designed to client specific requirements.

We would also like to bring your attention the Maintenance and Facilities Management Solutions we provide.

We do appreciate you taking the time to browse our newsletter. Your feedback is always welcome, as our aim is to include content which will be relevant and of interest to you in our future newsletters.

Finally I would just like to take this opportunity to wish you a Merry Christmas and a Prosperous New Year.

Kind Regards,

Mary Mackessy

Maintenance/ Facilities Management Solutions

Woodquay Centre

St. Paul's VEC

Case Study:

St. Paul's VEC

Our brief for St. Paul's Secondary School in Co Waterford was to design and manufacture a BMS controls system which would monitor and record energy control within the building.

Specifically the BMS was required to focus on the gas and water meters, the boiler and the controlling of the schools radiators.

The system needed to be accessible on a number of computers

Case Study: Wood Quay Centre Dublin City Walls

The Wood Quay Centre incorporates the original Viking City Wall dating from 1100AD. We were approached by the Wood Quay Centre located in Dublin, to design and manufacture a building management system which was required to monitor and control the following:

- Air Control Handling of City Wall space
- Air Control Handling of Exhibition Centre
- Sump Pump and Leak detection monitoring
- Control for the Air Conditioning Units
- Close Control Units for the Hiberno Viking City Walls

The BMS control system needed to include a full set of graphics, alarm logging and data logging on the supervisors PC.
