

Welcome to our July newsletter !

In our latest newsletter we feature a case study from New Park Hotel in Kilkenny where Manutec designed, manufactured and commissioned a building management control system for the new bedroom wing of their hotel and leisure centre.

We would also like to bring to your attention our Window & Blinds Controls solution as well as introducing the JACE-200 Controller in our featured articles.

We do appreciate you taking the time to browse our newsletter. Your feedback is most welcome as our aim is to include content which will be relevant to you in future newsletter topics.

Kind Regards,

Mary Mackessy

Feature: Window & Blind Control

Our latest computerised control system solution focuses on window and blind control. Our Natural Ventilation Control Systems monitor both internal and external conditions of a building. The Window Controls System allows the end-user to maintain specified temperature & CO2 levels.

With our Blind Control, the users are able to monitor the internal and external light levels and adjust the blinds accordingly.

Window & Blind Controls

JACE-200 Controller

Newpark Hotel

Case Study:

New Park Hotel

Our brief was to design and manufacture a control system for a new bedroom wing and leisure centre. The system was required to interface with Air Conditioning Systems and a Paragon Check-in System. Individual Room Controls were to be incorporated into the Building Management System also.

Feature: JACE-200 Controller

Manutec would like to introduce the JACE-200 Controller. This compact, embedded controller/ server platform is ideal for smaller facilities, remote sites, and for distributing control and monitoring throughout large facilities.

The JACE-200 makes it possible to control and manage external devices over the Internet and present real time information to users in web-based graphical views
